BILINGUAL

English and Spanish

OBJECTIVE

To experience a broad range of design disciplines, develop innovative concepts, and collaborate with professional designers who have a sensibility that's fun and subversive. To have the opportunity to be a part of multimedia projects, but also make use of my multi-faceted background working in print, web, and product design. To further my experience by working in a fast-paced, high-expectations environment that will extend my abilities as a designer and offer me a chance to demonstrate my excellent organizational and problem-solving skills.
